

CRUSHPROOF® TUBING

OVERHEAD HOSES

When a lighter weight or higher temperature hose is required in your application, choose one of our high-quality fabric and wire hoses. There are different options to fit any exhaust application from reels to rails to pulley systems. It is important to review these applications with us to make sure you get the right hose for the job. Not every hose will work in every application, and there are significant cost differences from hose to hose. Our goal is to help you find the best overall value. Here are some key features that our line offers:

- **ADAPTER OPTIONS**
- **FLAME RETARDANT**
- **650°F TO 2000°F**
- **HIGH TEMPERATURE**
- **CUSTOM LENGTHS**
- **CUSTOM COLORS**
- **REEL, RAIL, OR PULLEY**

Wire Hose Adapter (left) and Installed on hose with DSR600 (right).

We can combine the Crushproof® rubber hose with any of our sub-700°F rated hoses so that our full suite of adapters and fittings are available, while other fabric and wire hoses leave you stuck with one generic adapter and no Y option. We can even convert your current hoses to a Crushproof® system with our Wire Hose Adapter (shown above) which installs quickly and easily.
